

Corporate Membership

Give your women the confidence to take the next step in their careers

The network for women leaders

The **sphinxx Leadership Program** is specifically designed to assist women in realising their leadership potential.

With a Corporate Membership, you can reward and recognise your high potential women, giving them access to the latest in professional development to keep them ahead of the curve at work; along with a concierge of personal services to save time and take care of the important things, away from the office.

Corporate Membership in the sphinxx Leadership Program will underpin your strategy to retain high potential women and develop their leadership potential and - importantly - will provide a vehicle for women in your organisation to develop professional networks and build relationships with other senior women in business.

Participants have access to member-only benefits including online tools, audio library and discounts and offers. They will attend sphinxx development days with other motivated businesswomen where they'll learn new

skills, tap into role model leaders and build their confidence to take the next step in their careers.

Build your employer brand

As a Corporate Member, your organisation will be promoted on the sphinxx website, in media releases and at the Ascend development days as a supporter of senior women in business.

You will have the option of participating in research, being profiled in case studies and attending best practice briefings along with other corporate members.

Choose your level of membership

You can become a Corporate Member with as few as ten participants, and scale up with additional subscriptions.

All Corporate Members receive member benefits including a welcome kit, online access, monthly mailouts and member offers. The number and type of registrations you receive to the quarterly development days will depend on which of the following packages you choose:

- A **Fixed membership subscription** entitles you to register a maximum of ten members per subscription, each of whom receive full member benefits including a non-transferrable registration to four quarterly development days over a 12 month period.

Investment: \$8,950 per subscription.

- A **Flexi membership subscription** entitles you to register a maximum of 40 members per subscription for all online and remote access member benefits. In addition, you will receive 10 transferable registrations to four quarterly development days over a 12 month period, enabling up to 40 members of your organisation to experience a development day over the course of the year.

Investment: \$9,990 per subscription.

Corporate Membership

"Having sent delegates to a number of Ascend development days, I've been delighted with the opportunity this forum provides to reward my teams and challenge their thinking. Each of my team members has learned new skills, had the opportunity to network with other senior women in business and most importantly have received a confidence boost to their own personal development. The feedback has been excellent."

- Sharyn Baker, GM MLC MasterKey Service and 2009 Executive of the Year, Customer Service Institute of Australia
